### Unternehmensprofil

Our client is a real heavyweight on the German and international automotive market. With a six-digit number of employees, annual sales in the double-digit billion range and above-average growth (organic and through acquisitions) even in 2018, one offers their employees very secure jobs, strong development opportunities and a highly innovative environment.

This sheer size is also reflected in the IT landscape. More than 100 ERPs and hundreds of applications (SAP and non-SAP) create a heterogeneous IT basis. However, the thrust is clear: SAP has been one of the core technologies for many years and the standardization of the system in this direction is being pushed forward with vigor.

The large systems are currently still running on SAP ECC, smaller applications are already running on S/4HANA. SAP MDG for Suppliers and for Customers is already in full use. For MDG-F, a central instance is planned soon, where all finance processes will run in a standardized way (greenfield approach). MDG-F will act as governance here. The basis for the logistics system is currently being created. MDG-M also runs on S/4HANA. Business Partners are also in use.

You will become part of a team of just under a dozen consultants in Hungary and Germany, thus benefiting from enormous know-how and structures in which professional, personal and professional development is not only possible, but encouraged.

### Ihre Aufgaben

This is a clear hands-on role! Together with the MDG architect and the business, you discuss the requirements and process implementation in the system. You are part of implementation projects (remote or on-site) and will be responsible for data conversions, change requests and support.

### Ihr Anforderungsprofil

- Several years of experience in SAP MDG
- distinct hands-on mentality
- Ability to implement requirements via customizing or programming
- team player
- excellent knowledge of English; German and Hungarian advantageous
- depending on role willingness to travel about 30% (but also up to 0% possible)

element GmbH ist Ihre auf Finance & Banking, SAP, IT, Engineering und Healthcare spezialisierte Personalberatung.
